from 20 to 20 litres

**No compromises when it comes to packaging for your dangerous goods.**

The safety in transport and storage of dangerous goods on all transport routes is essentially determined by the quality and reliability of the packaging used.

Let's play it safe.

HUBER Packaging offers you the broadest range of type-tested packaging from tinplate for your dangerous filling goods. Dangerous goods packaging from HUBER Packaging are solid, safe, impermeable, UV-resistant and fully recyclable.

Depending on the type of packaging we produce UN packaging with X or Y marking, for filling materials up to density 2.7 g/cm<sup>3</sup> and with an inside pressure of up to 250 kPa.

Please ask for our general catalogue.

We shall be glad to advise you individually.
